

CC Shambots Robotics Team

Detroit Catholic Central High School | 27225 Wixom Rd, Novi, MI 48374

February 2021

Dear CC Shambots Supporter,

We sincerely appreciate the many sponsors who continue to make FIRST robotics possible at Detroit Catholic Central High School. Our team, the CC Shambots FRC 5907, consists of a large group of dedicated students who compete in FIRST Robotics (For Inspiration and Recognition of Science and Technology) in the FRC division. FIRST Robotics is designed to inspire high school students to explore career opportunities in the fields of business and STEM (science, technology, engineering and mathematics). We are currently participating in the 2020-2021 competition season despite the challenges and while anticipating that we will not be having in-person competition this year. This year's game, Infinite Recharge, has been modified to allow for remote competition and our team is actively designing and building a robot to compete remotely.

There are approximately 50 students involved in CC robotics this year. This number is growing every year as more and more students hear about the incredible opportunities that robotics provides them. As a result of our growing program, our team has relocated to a new, larger warehouse and office space very close to school. This allows us to social distance and offer the benefits of robotics to all students who want to participate either in person or remotely 4 days a week. Our adult mentors volunteer with our FIRST robotics students and guide them through the process of solving complex and challenging problems in a fun, engaging atmosphere.

Robotics is an exciting program, but it is expensive to participate in. Our team seeks funding to cover the cost of the robot starter kits we purchase, additional parts, tools and equipment, competition registration costs and other expenses. Our robotics program budget is approximately \$60,000 annually. This comes through corporate donations and sponsorships as well as from participating family and individual sponsorships. Your company may be able to offer financial support for our success. Many firms in the metro Detroit area have dedicated FIRST robotics sponsorship programs that simply require an employee to have some affiliation with a team. Our team can handle completing the necessary applications. We also appreciate donations of tools, raw materials, technical support and professional expertise. All contributors are tax deductible.

Please see the attached form for more information. If your company has its own application form for sponsorships, we are happy to complete that application. Thank you for your interest in the CC Shambots! We look forward to welcoming you or your company as one of our sponsors.

Sincerely,

Heather Vingsness, Head Coach, CC Faculty, 734-245-9797
